  - SDLC
  - Manual Testing
  - JIRA
  - React JS
  - Agile environment Kanban

---

### Experience

---

#### Senior Engineer Intel at L&T Technology services, Bangalore

JUL 2021 — SEP 2022

- Converted mockups, wireframes into HTML and CSS code.
- Collaborated with teams using Git/GitHub for version control, branching, reviewing PR, merging and conflict resolution.
- Implemented responsive design and cross-browser compatibility for different screen sizes.
- Participate in code reviews to maintain code quality and share knowledge.
- Performed various testing types in the Agile environment.

#### Associate Product Engineer at Harman Connected Services, Bangalore

FEB 2019 — JUL 2021

- Conducted stress and stability testing on a spectrum of graphics cards including PEG, AMD and MSI by running 3D-benchmark, Sys-Mark, burn-in, prime 95, runner tool, Load runner and Lin pack etc. to ensure best performance and unwavering reliability.
- Involved in board bring-up, firmware and OS flashing. Performed Sanity testing, Black Box testing (functional and non-functional aspects), Regression testing and retesting.
- Used tools like JIRA and HSDS for bug reporting and tracking processes. Actively engaged in debugging and root cause analysis. Used tools like ITP and WinDBG for issue resolution.
- Developed and executed system validation, Exploratory/Random test cases within the UEFI and OS environment to evaluate and ensure the overall performance of the System Under Test (SUT).
- Played a pivotal role in critical validation that includes Functionality tests and Sanity tests with different SKU's to verify quality standards across a range of SKU configurations.

- Proficiently utilized essential tools, including Winscp for seamless file transfer between local and remote systems, Putty for remote SSH access, KVM, Spider View and Mobaxterm.
- Possess validation experience across a diverse range of hardware systems including tablets, laptops, PCs etc.
- Certified ISTQB foundation level.

---

## Personal Projects

---

### Github Portfolio

- HTML, CSS and JavaScript.

### Grocery App

- A shopping app to revolutionize shopping convenience. Which allows you to shop for groceries online and even make quick offline purchases by scanning items and paying on the go.
- Any-List brings a time-saving solution, where the users can effortlessly generate their own bills via scanning. It saves time and energy for both shoppers and bill counter personnel.
- Created using Next.js and Implemented NextAuth with MongoDB for secure personalized authentication and user profile management, while enabling efficient grocery data storage, order history, cart management, and flexible payment options like PayPal, Credit-Card and Cash.
- Next JS, MongoDB, Next Auth authentication, Git and GitHub.

---

## Education

---

### **Spiced Academy, Berlin, Germany**

MAY 2023 — AUG 2023

- Specialized in HTML, CSS, JavaScript, React.js, Typescript, MongoDB, GitHub and cutting-edge web technologies.
- Developed many impactful projects showcasing strong frontend development skills.
